

hello, i would like to point out to the fcc that we in the United States have not been

recieving the news in a democratic way. Big business and media monopolies as well as your own legislation has prohibited a dissenting voice in the media.

Other

countries have a freedom of media(esp. the news) unseen in the US. Fox is run by republicans and is nothing but a republican propaganda machine. America needs you to change the way things are run and allow international broadcasts into our country as well as making room in the media for independant media.
